

## Participation report

I think I should receive a grade between 5/20 and 10/20 (7.5/20?) for participation.

The items I submitted are as follows:

- Tutorial 2 practice problem discussion
- Tutorial 3 practice problem discussion
- Tutorial 4 practice problem discussion
- Assignment 1 practice problem discussion
- Assignment 2 practice problem discussion
- Assignment 3 practice problem discussion
- Assignment 4 practice problem discussion
- + what's included in this submission

In total that is 9 practice problem discussions, this should count as outstanding in that category.

Judging from the rubric, had I done some other kind of participation I would be in the 10-15 range, however

life has been busy especially in recent weeks and I have a lot of other assignments (2804 is a killer) to do so I chose to only do practice problems which would help me understand the course material.

This isn't meant to be a sob story, but I hope you can understand my reasoning and give me a decent grade :).
